[mahmoud-salama.vercel.app/card.html](#)

Study material only. This document does not replace current clinical guidelines, local protocols, or patient-specific medical advice.

Verification and editorial method

Every source page from 1 to 116 was visually reviewed page by page. The handwritten notes were compared with the structured data, wording errors were corrected, and clear abbreviations were expanded where this improved readability. The final dataset contains all 100 recall sessions and 1,092 individual items, with no missing source-page numbers. Where the original page itself contains only a short label or unusual wording, that meaning is preserved rather than supplemented with invented clinical details.

Key corrections made during the final review

- Page 12: corrected the child's age from 4 months to 9 months in the squint/retinoblastoma history.
- Page 15: corrected the unclear label to Wolff-Parkinson-White (WPW) syndrome.
- Page 16: clarified the pacemaker item as a cardiovascular examination.
- Page 31: recorded quadriplegic and hemiplegic cerebral palsy as separate case types.
- Page 61: clarified convulsions/fits beginning at 4 months followed by regression.
- Page 64: preserved the literal source wording "10 doses" for dexamethasone in croup.
- Page 102: clarified the communication topic as a chaperone discussion.

How to use this edition: study by year, centre and category; use the source-page number shown under each session when you need to compare the typed text with the original handwriting.

Abbreviation glossary

ADHD Attention-deficit/hyperactivity disorder	ALL Acute lymphoblastic leukaemia
AS Aortic stenosis	ASD Atrial septal defect
AVSD Atrioventricular septal defect	BiPAP Bilevel positive airway pressure
BWS Beckwith-Wiedemann syndrome	CAMHS Child and Adolescent Mental Health Services
CCHD Cyanotic congenital heart disease	CF Cystic fibrosis
CHD Congenital heart disease	CMV Cytomegalovirus
CMPA Cow's-milk protein allergy	CMT Charcot-Marie-Tooth disease
CP Cerebral palsy	CPAP Continuous positive airway pressure
CRP C-reactive protein	CVS Cardiovascular system
DD Differential diagnosis	DDH Developmental dysplasia of the hip
DIOS Distal intestinal obstruction syndrome	DKA Diabetic ketoacidosis
DM / T1DM Diabetes mellitus / type 1 diabetes mellitus	DMD Duchenne muscular dystrophy
EBM Expressed breast milk	EBV Epstein-Barr virus
EDS Ehlers-Danlos syndrome	FTT Failure to thrive
GBS Guillain-Barre syndrome	GDD Global developmental delay
GERD Gastro-oesophageal reflux disease	GTCS Generalised tonic-clonic seizure
HIE Hypoxic-ischaemic encephalopathy	HSM Hepatosplenomegaly
HSP Henoch-Schonlein purpura / IgA vasculitis	IEM Inborn error of metabolism
ITP Immune thrombocytopenic purpura	JIA Juvenile idiopathic arthritis
LMNL Lower motor neuron lesion	MPS Mucopolysaccharidosis

MR Mitral regurgitation	MRSA Methicillin-resistant Staphylococcus aureus
MSK Musculoskeletal	NAI / NAT / NATT Non-accidental injury / trauma
NEC Necrotising enterocolitis	NF Neurofibromatosis
NICU Neonatal intensive care unit	OSA Obstructive sleep apnoea
PDA Patent ductus arteriosus	PEG Percutaneous endoscopic gastrostomy
PGALS Paediatric gait, arms, legs and spine examination	PROM Prolonged rupture of membranes
PS Pulmonary stenosis	PVL Periventricular leukomalacia
RHD Rheumatic heart disease	ROP Retinopathy of prematurity
RSV Respiratory syncytial virus	SGA Small for gestational age
SIADH Syndrome of inappropriate antidiuretic hormone secretion	SLE Systemic lupus erythematosus
SMA Spinal muscular atrophy	SNHL Sensorineural hearing loss
SSSS Staphylococcal scalded skin syndrome	SVT Supraventricular tachycardia
TB Tuberculosis	TOF Tetralogy of Fallot
TPN Total parenteral nutrition	TTG Tissue transglutaminase antibody
UMNL Upper motor neuron lesion	UTI Urinary tract infection
VSD Ventricular septal defect	VZV Varicella-zoster virus
WPW Wolff-Parkinson-White syndrome	

2025

47 sessions | 508 recall items | 15 centres

Egypt — December 2025 — Day 2

Egypt | Centre: Egypt | Source pages 115-116

History

- Haematuria; mother is worried about bleeding per rectum.

Communication

- Breastfeeding discussion with a midwife upset about possible admission and blood tests in a jaundiced baby losing more than 10% of body weight.
- Fifteen-year-old with cystic fibrosis who smokes and refuses ward admission for IV antibiotics.

Video

- Pneumonia.
- Self-harm.

Clinical

- Operated VSD with murmur.
- Achondroplasia.
- Spherocytosis.
- Thalassaemia.
- Cerebral palsy.

Development

- Williams syndrome — fine-motor assessment.

Egypt — December 2025 — Day 1

Egypt | Centre: Egypt | Source page 114

History

- Crohn's disease.

Communication

- Obesity.
- Chronic fatigue syndrome.

Video

- Squint due to sixth-nerve palsy.
- Viral-induced wheeze.

Clinical

- Achondroplasia.
- Congenital heart disease with residual murmur.
- Thalassaemia.
- Cerebral palsy.

Development

- Regression and autism.

UAE — November 2025 — Day 2

United Arab Emirates | Centre: UAE | Source pages 108-109

History

- Possible Sandifer syndrome: five-year-old after herpetic encephalitis at age two, on antiseizure medication, with generalised stiffness after feeding.

Communication

- Eleven-month-old with global developmental delay and microcephaly.
- Mother with depression and a four-day-old jaundiced newborn — discuss admission and phototherapy.

Video

- Eczema herpeticum.
- Antalgic gait suggesting osteomyelitis.

Clinical

- MPS.
- Thalassaemia.
- Hemiplegia.
- Cystic fibrosis.
- Spina bifida.

Development

- Two-year-old with fine-motor regression to 3–6-month milestones, global delay, cataract, low-set ears and hypotonia.

Jeddah — November 2025 — Day 2

Saudi Arabia | Centre: Jeddah | Source pages 112-113

History

- Viral myocarditis.

Communication

- Vomiting in an infant with normal growth: GERD and differential diagnosis including congenital pyloric stenosis.
- Nine-year-old with cystic fibrosis and Pseudomonas infection — discuss management with father, concerns about fault, swimming-pool exposure and travel.

Video

- High-steppage gait suggesting GBS.
- Scarlet fever.

Clinical

- Klippel–Feil syndrome — MSK examination.
- Median sternotomy with residual pulmonary stenosis.
- Quadriplegia with clear clonus.
- Thalassaemia.
- Kartagener syndrome.
- Dextrocardia.

Development

- Eighteen-month-old with brain tumour diagnosed at three months — motor assessment.

Kolkata — November 2025 — Day 1

India | Centre: Kolkata | Source page 106

History

- Functional constipation.

Communication

- Leukaemia — breaking bad news.
- Pancytopenia with hepatosplenomegaly — counsel for bone-marrow biopsy.
- Antenatal renal pelvis dilatation to 16 mm — postnatal counselling and investigation; ultrasound after one week and prophylactic antibiotics.

Video

- HIE.
- Croup.

Clinical

- DMD.
- Pulmonary stenosis.
- Post-Kasai case with hepatosplenomegaly and rooftop scar.
- JIA / haemarthrosis.
- VSD.

Development

- DMD — gross-motor assessment.

UAE — November 2025 — Day 1

United Arab Emirates | Centre: UAE | Source pages 107-108

History

- Anaphylaxis in a known case of food allergy.

Communication

- Obesity explained to a medical student.
- Rolandic epilepsy explained to the mother.

Video

- Vesicular rash on flexors with secondary infection — possible impetigo.
- DDH.

Clinical

- Noonan syndrome.
- Ataxia.
- Hemiplegia.
- Williams syndrome.
- Aortic stenosis.
- Rickets.
- Thalassaemia.
- Kartagener syndrome.
- Down syndrome with VSD.

Development

- Speech delay in a child with small genitalia and undescended testis after corrective surgery.

Jeddah — November 2025 — Day 1

Saudi Arabia | Centre: Jeddah | Source pages 110-111

History

- Sudden shortness of breath while shopping after eating sweets — anaphylaxis without EpiPen; history of cow's-milk allergy and family allergy/asthma; discuss follow-up and advice.

Communication

- Challenging behaviour and why it is not ADHD; mother works and baby spends most time with grandmother.
- Ten-week-old with fever, irritability and abnormal urine test — UTI work-up and imaging.

Video

- Intestinal obstruction: child vomiting with abdominal distension.
- HSP.

Clinical

- Thalassemia.
- DMD.
- Congenital heart disease with residual murmur.
- Short stature / Russell-Silver syndrome.
- Dextrocardia.

Development

- Two-and-a-half-year-old — cognitive assessment; history otherwise empty with autism details.

UK — 13 October 2025

United Kingdom | Centre: UK | Source pages 104-105

History

- Breath-holding attack: two-year-old fell while playing, became blue and unresponsive.

Communication

- Thirteen-year-old with anorexia nervosa — speak to the mother and explain admission.
- Nine-month-old with previous eczema herpeticum and severe eczema after a new milk formula; referred to dermatology.

Video

- Acute mastoiditis.
- Pyloric stenosis.

Clinical

- CVS: ejection systolic murmur.
- Eye examination in Horner syndrome.
- Fourteen-year-old girl with right subcostal scar and history of neonatal jaundice / congenital biliary atresia.
- Marfan syndrome — PGALS.
- Chest deformity.
- Chest examination in a small four-year-old with large head, macroglossia, skeletal dysplasia, PEG and squint; discuss causes and management.
- Neurological examination — hemiplegia.

Development

- Down syndrome with GDD — fine-motor assessment.

UK — 12 October 2025

United Kingdom | Centre: UK | Source page 103

History

- Chest pain.

Communication

- Nephrotic syndrome relapse.
- Aminophylline overdose.

Video

- ITP.
- Transient synovitis.

Clinical

- Eye examination for ptosis.
- MSK examination: arthritis / Ehlers–Danlos / Marfan.
- CVS: pulmonary stenosis or innocent murmur.
- Abdominal examination: post-Kasai scar.

Development

- GDD — fine-motor assessment.

Singapore — October 2025 — Day 1

Singapore | Centre: Singapore | Source page 102

History

- Bronchiolitis in a 14-month-old boy.

Communication

- Chaperone discussion.
- PVL.

Video

- Pleural effusion.
- Leukaemia.

Clinical

- VSD.
- Dextrocardia.
- Pallor and splenomegaly — differential diagnosis.
- Hemiplegia.

Development

- Beckwith–Wiedemann syndrome — cognitive assessment.

Jeddah — September 2025 — Day 2

Saudi Arabia | Centre: Jeddah | Source pages 94-95

History

- Orbital cellulitis.

Communication

- Peanut allergy.
- DDH.

Video

- Croup.

- PDA.

Clinical

- Ehlers–Danlos syndrome.
- Hemiplegia.
- DMD.
- Chronic suppurative lung disease.
- Hepatosplenomegaly.
- Residual pulmonary stenosis.

Development

- Fits beginning at three months, on sodium valproate — motor assessment.

Chennai — September 2025 — Day 2

India | Centre: Chennai | Source pages 97-98

History

- Known asthma with poor control.

Communication

- ROP requiring laser in a preterm infant.
- Teenager with thalassaemia.

Video

- Shingles.
- Facial palsy.

Development

- Sturge–Weber syndrome with GDD — cognitive assessment.

Egypt — September 2025 — Day 2

Egypt | Centre: Egypt | Source pages 100-101

History

- Limping child — differential diagnosis including septic arthritis.

Communication

- Counsel a grandmother who is a rheumatologist about a 29-week, 1.5-kg preterm infant who deteriorated from CPAP to ventilation and received surfactant; explain preterm complications and ongoing deterioration.
- Needlestick injury to a nurse while sampling a girl from an HIV-endemic area who had previous fever; obtain consent from the mother to test the child.

Video

- Pertussis.
- Infantile spasms.

Clinical

- Systolic murmur in a non-operated child.
- Spina bifida.
- Marfan syndrome.
- MPS — abdominal and general examination.

Development

- Hydrocephalus with shunt, obstructed labour and maternal fever before delivery — speech and social assessment.

Jeddah — September 2025 — Day 1

Saudi Arabia | Centre: Jeddah | Source pages 93-94

History

- Constipation.

Communication

- Laryngomalacia — explain to the mother.
- Formula was given despite exclusive breastfeeding without informing the mother.

Video

- Viral-induced wheeze.
- Infantile spasms.

Clinical

- Cystic fibrosis.
- DMD.
- Quadriplegia.
- Operated congenital heart disease.
- Pacemaker.
- Thalassaemia.
- Short stature — differential diagnosis.

Development

- Cognitive assessment in MPS with regression and autism.

Chennai — September 2025 — Day 1

India | Centre: Chennai | Source pages 96-97

History

- Acute-onset eye swelling with inability to open the affected eye.

Communication

- Peanut allergy after peanut butter was given by staff; symptoms subsided with antihistamine; child admitted for viral wheeze improved with back-to-back nebulisers.
- DDH diagnosed at eight months; mother is angry about delayed diagnosis.

Video

- PDA.
- Croup.

Clinical

- Median sternotomy in a six-year-old with clubbing but no cyanosis.
- Rooftop abdominal scar with hepatosplenomegaly.
- Quadriplegic CP.
- MPS.

Development

- Two-year-old with spasmodic movements from three months followed by developmental delay and regression.

Egypt — September 2025 — Day 1

Egypt | Centre: Egypt | Source pages 98-99

History

- Cystic fibrosis with cough and green sputum — Pseudomonas.

Communication

- Coarctation of the aorta with different upper- and lower-limb blood pressures and fainting; compare with aortic stenosis, fainting and weak peripheral pulses.
- Glycopyrrolate use in cerebral palsy.

Video

- Shingles in a six-month-old receiving steroids.
- Coeliac disease.

Clinical

- Quadriplegia.
- Noonan syndrome.
- Chronic haemolytic anaemia.
- Operated heart with residual pulmonary stenosis.
- Pulmonary stenosis in Williams syndrome.

Development

- After brain tumour with hemiplegia — fine-motor assessment.

UK — 13 June 2025

United Kingdom | Centre: UK | Source pages 91-92

History

- Known dermatomyositis presenting with an exacerbation.

Communication

- NATT.
- Infected eczema — follow-up discussion.

Video

- Pneumonia.
- Osteomyelitis.

Clinical

- Median sternotomy, webbed neck and grade 4/6 pansystolic murmur.
- DMD in a wheelchair user.
- Seventeen-year-old with left iliac-fossa mass and large scar after renal transplant.
- Child with tracheostomy, large tongue, hypopigmented hair/eyebrows and chest crackles.

Development

- Known phenylketonuria — cognitive assessment.

UK — June 2025 — Day 1

United Kingdom | Centre: UK | Source page 90

History

- Down syndrome with leukaemia.

Communication

- Wrong lumbar puncture.
- Adolescent alcohol use.

Video

- DDH.
- Cushing syndrome.

Clinical

- Different clinical cases; details are not specified on the source page.

Development

- Non-accidental trauma (NATT) with hemiplegia — motor assessment.

Jeddah / UAE — May 2025 — Day 2

Saudi Arabia | Centre: Jeddah / UAE | Source pages 81-82

History

- Kartagener syndrome.

Communication

- Constipation and soiling.
- Congenital hypothyroidism.

Video

- Stridor due to laryngeal haemangioma.
- Herpes zoster.

Clinical

- Thalassaemia.
- Hemiplegia and diplegia.
- Residual pulmonary stenosis after TOF repair.
- Prosthetic valve.
- Ehlers–Danlos syndrome.
- Russell–Silver syndrome.
- Rickets.
- Chronic renal failure.

Development

- GDD — gross-motor assessment; likely congenital myopathy or a genetic cause.
- Bilateral sensorineural hearing loss, small head, squint, ptosis and positive consanguinity.

UAE — May 2025 — Day 2

United Arab Emirates | Centre: UAE | Source pages 83-84

History

- Six-year-old with orbital cellulitis and left-eye swelling/redness; grandmother is ill; discuss guideline-based care and vaccination.

Communication

- MRSA 21 days after gastroschisis surgery; transferred to establish feeding — discuss discharge timing and hygiene.
- Teenager with diabetes and albuminuria who smokes.

Video

- ITP in a three-year-old with rash.
- Portal hypertension.

Clinical

- Pulmonary stenosis.
- Chronic haemolytic anaemia.
- Cystic fibrosis with DIOS.
- Quadriplegia.

Development

- Eighteen-month-old with brain tumour diagnosed at three months, on antiepileptic treatment, with social issues — motor assessment.

Egypt — May 2025 — Day 2

Egypt | Centre: Egypt | Source page 86

History

- Diabetes with poor compliance after moving to another city.

Communication

- Anaphylaxis after an insect sting — discuss EpiPen use.
- Osteosarcoma confirmed by biopsy; parents do not want the child told — ethical dilemma.

Video

- Epilepsy syndrome.
- ITP.

Clinical

- Down syndrome after operated CHD with residual murmur.
- Mosaic Turner syndrome.
- Splenomegaly — differential diagnosis.
- Quadriplegic CP.

Development

- GDD with autistic features — fine-motor assessment.

Sri Lanka — May 2025 — Day 2

Sri Lanka | Centre: Sri Lanka | Source pages 88-89

History

- Oligoarticular JIA.

Communication

- Eczema; mother refuses GP follow-up.
- H. pylori.

Video

- Croup.
- Acute viral hepatitis.

Clinical

- VSD.
- Thalassaemia.
- Hemiplegia.
- Neurofibromatosis.

Development

- Global developmental delay with hearing aid — motor assessment; congenital rubella syndrome.

Egypt — May 2025 — Day 1

Egypt | Centre: Egypt | Source page 85

History

- Ulcerative colitis with non-compliance.

Communication

- Vegetarian diet with iron deficiency.
- Mother refuses discharge of a stable preterm infant.

Video

- Periorbital cellulitis.
- CCHD.

Clinical

- TOF.
- DMD.
- Cerebral palsy.
- MPS.
- Turner syndrome.

Development

- Meningitis — cognitive assessment.

Singapore — May 2025 — Day 1

Singapore | Centre: Singapore | Source page 87

History

- Daytime wetting.

Communication

- Withholding HIV information.
- Febrile convulsions.

Video

- Laryngomalacia.
- Congenital heart disease.

Clinical

- Job syndrome.
- Residual murmur from VSD.
- Pulmonary stenosis after median sternotomy.
- Hemiplegia with facial droop.
- Thalassaemia.

Development

- Beckwith-Wiedemann syndrome — cognitive assessment.

Sri Lanka — May 2025 — Day 1

Sri Lanka | Centre: Sri Lanka | Source page 88

History

- Dermatomyositis.

Communication

- Apology related to hypoglycaemia.
- Biliary atresia.

Video

- Nephrotic syndrome.
- Viral-induced wheeze.

Development

- Meningitis — cognitive assessment.

Jeddah — May 2025 — Days 1 & 3

Saudi Arabia | Centre: Jeddah | Source page 80

History

- Cephalhaematoma.

Communication

- Dermatitis artefacta.
- Delayed surgery in a patient with CP.

Video

- Lymphadenitis.
- Nephrotic syndrome.

Clinical

- Dextrocardia.
- Residual pulmonary stenosis after TOF repair.
- Cystic fibrosis with quadriplegia.
- Paraplegia with thalassaemia.
- Waardenburg syndrome.

Development

- Congenital hypothyroidism — fine-motor assessment.

Mumbai — April 2025 — Day 2

India | Centre: Mumbai | Source pages 73-74

History

- First unprovoked GTCS in a known case of febrile seizure; father is worried about a tumour.

Communication

- RSV infection acquired in hospital.
- Preterm infant with NEC and TPN who needs enteral feeds started.

Video

- Five-month-old with maculopapular rash and peeling — SSSS.
- PDA in a preterm infant.

Clinical

- CNS: lower-limb motor examination with knee contractures.
- Respiratory: chronic suppurative lung disease.
- Abdominal examination: thalassaemia.
- CVS: mitral regurgitation with cyanosis.

Development

- Speech delay — social and cognitive assessment.

Pakistan — April 2025 — Day 2

Pakistan | Centre: Pakistan | Source pages 77-78

History

- Possible vitamin-K deficiency in a six-week-old who became pale in the cot at midnight — take a focused history.

Communication

- Type 1 diabetes with positive TTG — discuss coeliac management, diet plan and next confirmatory test.
- Child with a burn; mother is afraid child-protection services will take her babies.

Video

- Gilbert syndrome.
- Pleural effusion.

Clinical

- Abdominal examination — Wilms tumour.
- Respiratory examination — asthma.
- General examination in Down syndrome after repaired AVSD.
- Neurological examination — DMD versus CP.

Development

- Two-year-old with shaken baby syndrome in foster care — fine-motor assessment.

Qatar — April 2025 — Day 2

Qatar | Centre: Qatar | Source pages 78-79

History

- Viral-induced wheeze.

Communication

- NATT — discuss admission with the mother.
- Turner syndrome — discuss confirmatory testing with the mother.

Video

- SSSS.
- Nephrotic syndrome.

Clinical

- Patient with ptosis — examine all cranial nerves.
- Six-year-old, stunted and dysmorphic, with median sternotomy and two drain scars, pansystolic murmur and thrill.
- MPS with short stature.
- Abdominal examination — thalassaemia.

Development

- Preterm infant after NICU admission with hemiplegia — motor assessment.

Mumbai — April 2025 — Day 1

India | Centre: Mumbai | Source page 72

History

- Poor weight gain and anaemia.

Communication

- NATT — counsel the mother.
- Counsel a 15-year-old about H. pylori treatment.

Video

- Erb's palsy.
- Stridor.

Clinical

- Respiratory examination: chronic suppurative lung disease.
- CVS: mitral regurgitation.

- Abdominal examination: hepatosplenomegaly in thalassaemia.
- Lower-limb motor examination.

Development

- Neuroregression — gross-motor assessment.

Qatar — April 2025 — Day 1

Qatar | Centre: Qatar | Source pages 74-75

History

- Six-year-old boy with body and facial swelling, second episode in three years.

Communication

- Twenty-week pregnancy with bilateral cleft lip and palate on ultrasound — explain the post-delivery plan.
- Junior trainee altered the notes of an admitted child — explain consequences.

Video

- Bell's palsy.
- ITP.

Clinical

- Fourteen-year-old with sternotomy, drain and Kocher scars.
- Lower-limb MSK examination in a two-year-old with spina bifida.
- Abdominal examination in a small-for-age ten-year-old with hepatosplenomegaly.
- Cranial-nerve examination in a ten-year-old with third-nerve palsy.

Development

- Two-and-a-half-year-old girl with Down syndrome — gross-motor assessment.

Pakistan — April 2025 — Day 1

Pakistan | Centre: Pakistan | Source page 76

History

- Four-year-old girl with recurrent cough and wheeze — asthma.

Communication

- Turner syndrome — information giving.
- Suspected abuse / NAI.

Video

- Nephrotic syndrome.
- SSSS.

Clinical

- Abdominal examination — acute hepatitis.
- Respiratory examination — cystic fibrosis.
- MPS.
- Spastic quadriplegia with malnutrition.

Development

- Hypoxic stroke.

Malaysia — February 2025 — Day 2

Malaysia | Centre: Malaysia | Source pages 2-5

History

- 1-year-old with prolonged seizure, fever and URTI three days earlier; admitted to ward; baseline investigations normal; brief seizures since 3 months of age; multiple antiseizure medicines, latest Keppra syrup and vigabatrin only; GDD; compliant with treatment; brain MRI performed; positive consanguinity; first child died at age 2 with lung infection and developmental delay.

Communication

- Small VSD and poor dental care; developed fever with raised WBCs and CRP; culture *Streptococcus viridans*. Explain infective endocarditis to the father, whether it could have been prevented, whether it was his fault, duration of antibiotics, and practical support because the father is busy and leaves the child with a caregiver.
- 8-year-old with type 1 diabetes since age 3; not well controlled during the last year; HbA1c 10; three DKA episodes; most recent six months ago; UTI. Child does not know how to inject. Mother has other children to care for and wants to change from three injections to two. Explain DKA and whether it will affect school.

Video

- Nephrotic syndrome.
- Asthma.

Clinical

- CVS: 11-year-old with intermittent chest pain; no scar; pansystolic murmur radiating to the left axilla.
- CNS: 8-year-old, UMNL lower limbs hyperreflexia; spine normal; orthosis; cannot walk.
- MSK: 11-year-old, small; multiple hypopigmented lesions on extensor surfaces; limited flexion and extension of the wrist; no rashes.
- Other examination: 11-year-old dysmorphic child; eyelid capillaries; high-arched palate; small mouth; no jaundice; rooftop abdominal scar; liver 2 cm; spleen 7 cm.

Development

- 4-year-old ex-preterm, 35 weeks, birth weight 2 kg; bowel operation on day 3 of life with brief cardiac arrest; admitted for one month and ventilated for four days; MRI at 6 months showed periventricular leukomalacia (white-matter problem); later seizure, no current medicines, no feeding issue spastic diplegic CP due to HIE; GDD.

Oman — February 2025 — Day 2

Oman | Centre: Oman | Source pages 5-6

History

- Ketotic hypoglycaemia.

Communication

- Febrile neutropenia in a child with Wilms tumour who does not want to stay in hospital.
- Angry mother because no hospital seat is available for neonatal jaundice.
- Uncontrolled asthma.
- Autoimmune hepatitis — ethical dilemma.

Video

- Kawasaki disease.
- GBS.
- Mastoiditis.

Clinical

- Wheelchair user with UMNL (diplegia).
- Cranial nerve examination.
- CMT.
- PS, VSD and Noonan syndrome.
- Chronic suppurative lung disease.

- Chest deformity.
- Immunodeficiency.
- Sick cell anaemia.

Development

- Hemiplegia — fine motor assessment.

Jeddah — February 2025 — Day 2

Saudi Arabia | Centre: Jeddah | Source page 7

History

- SLE.

Communication

- TB with positive NAT.
- Coeliac disease.

Video

- ITP.
- Facial palsy.

Clinical

- Dextrocardia.
- Thalassaemia.
- Hemiplegia.
- PS.
- Chronic suppurative lung disease.

Development

- Abnormal behaviour — Williams syndrome.

Mumbai — February 2025 — Day 2

India | Centre: Mumbai | Source page 10

History

- First unprovoked seizure (GTCS) in a known case of febrile seizure; father worried about a tumour.

Communication

- RSV infection acquired in hospital.
- Preterm infant with NEC on TPN who needs to start enteral feeds.

Video

- SSSS rash in a 5-month-old with peeling skin.
- PDA in a preterm infant.

Clinical

- Lower-limb motor examination with knee contractures.
- Chronic suppurative lung disease.
- Thalassaemia.
- MR with cyanosis.

Development

- Speech delay cognitive assessment.

Egypt — February 2025 — Day 2

Egypt | Centre: Egypt | Source pages 12-13

History

- 9-month-old baby noted in nursery to have a squint; the GP saw a white spot in the eye; otherwise the history is unremarkable and development is normal. Differential diagnosis of squint — retinoblastoma.

Communication

- Intussusception: role of X-ray and how to relieve it.
- Subarachnoid haemorrhage — needs phenytoin.
- Teenager with subarachnoid haemorrhage after head trauma; became comatose and ventilated, now recovered. Explain what happened and discuss going on a trip with friends.
- Intussusception.

Video

- Stridor croup in a 3-month-old.
- EBV blanchable rash.

Clinical

- MPS.
- Kartagener syndrome.
- Hemiplegia.
- Diplegia.
- Thalassaemia.
- MR RF details.
- Thyroid examination.

Development

- Autism.

Malaysia — February 2025 — Day 1

Malaysia | Centre: Malaysia | Source page 2

History

- SLE.

Communication

- TB diagnosis and management.
- SVT.

Video

- Bell's palsy.
- ITP.

Clinical

- Ataxic gait and cerebellar examination.
- Median sternotomy and mitral clicks valve replacement.
- Chronic suppurative lung disease.
- Glycogen storage disease.

Development

- Williams syndrome and ADHD — speech and social assessment.

Jeddah — February 2025 — Day 1

Saudi Arabia | Centre: Jeddah | Source pages 6-7

History

- HSP non-blanchable rash, abdominal pain and bilateral ankle arthritis.

Communication

- Obese child with chest infection diagnosed with type 2 diabetes; high RBS and HbA1c; BMI 35; whole family obese. Mother is angry because the GP ordered tests without telling her. Discuss the management plan.
- Newborn, a few hours old, 35+ weeks; PROM 28 hours; plan to start IV benzylpenicillin plus gentamicin, but the mother refuses.

Video

- Acute severe asthma — management plan and doses.
- Leukaemia cervical lymph nodes, hepatosplenomegaly and rash.

Development

- Hemiplegia — motor assessment. Birth asphyxia; NICU admission for two weeks; seizure on the first day of life; discuss head cooling.

Oman — February 2025 — Day 1

Oman | Centre: Oman | Source page 8

History

- Kawasaki disease fever for seven days, rash and abdominal pain.

Communication

- Wrong bottle feeding.
- Cystic-fibrosis-related diabetes.

Video

- Pertussis.
- Chorea.

Clinical

- Chronic suppurative lung disease.
- UMNL.
- VSD.

Development

- Cognitive assessment.

Mumbai — February 2025 — Day 1

India | Centre: Mumbai | Source page 9

History

- Poor weight gain and anaemia.

Communication

- Non-accidental trauma (NATT) — counsel the mother.
- Counsel a 15-year-old about H. pylori treatment.

Video

- Erb's palsy.
- Stridor.

Clinical

- Chronic suppurative lung disease.

- MR.
- Thalassaemia with HSM.
- Lower-limb motor examination.

Development

- Neuroregression gross motor assessment.

Egypt — February 2025 — Day 1

Egypt | Centre: Egypt | Source page 11

History

- Leukaemia (ALL).

Communication

- Ethical dilemma for a medical student about limited resources: one baby has multiple-organ failure and the other is a good preterm candidate.
- Nocturnal enuresis.

Video

- HSP.
- Laryngomalacia.

Clinical

- Thyroid examination.
- Asthma.
- Diplegia.
- Short stature.
- NF.
- MR and VSD.
- Achondroplasia.

Development

- Neuroregression and fits for cognitive assessment — DMD and autism.

Hyderabad — January 2025 — Day 2

India | Centre: Hyderabad | Source page 14

History

- Infant with seizure hypocalcaemia.

Communication

- Vulvovaginitis.
- Croup and an extra dexamethasone dose.

Video

- Dermatitis artefacta.
- Varicella with secondary bacterial infection.

Clinical

- MSK: short stature alopecia and glasses.
- Spastic hemiplegia.
- MR with RHD.
- Thalassaemia and hereditary spherocytosis.

Development

- Fetal alcohol syndrome — fine motor assessment.

Jeddah — January 2025 — Day 2

Saudi Arabia | Centre: Jeddah | Source pages 16-17

History

- Coeliac disease diarrhoea, failure to thrive and differential diagnosis of malabsorption.

Communication

- Fractured humerus.
- Functional abdominal pain; mother worried about ulcerative colitis because she was diagnosed with it.

Video

- Focal seizure in a 2-month-old — could it be late-onset haemorrhagic disease of the newborn?
- Croup.

Clinical

- Right hemiplegia.
- Cardiovascular examination in a patient with a pacemaker.
- Thalassaemia with jaundice and HSM.
- Kartagener syndrome: hearing aid, dextrocardia and clubbing.
- Residual PS (TOF).
- MSK: hypermobility / ED.
- Klippel-Feil syndrome.
- Quadriplegic CP.

Development

- 4-year-old — fine motor and milestones. Large head, thick hair, history of febrile seizure that stopped; maternal diabetes during pregnancy; feeding issue; baby obese and had hypoglycaemia. Could it be Sotos syndrome?

Hyderabad — January 2025 — Day 1

India | Centre: Hyderabad | Source pages 13-14

History

- Bone tumour.

Communication

- Cleft lip and palate.
- VZV prophylaxis for a nephrotic child on steroids exposed to chickenpox in hospital.

Video

- Erb's palsy.
- Mastoiditis.

Clinical

- Thalassaemia.
- Hemiplegia.
- Turner syndrome with short stature.
- VSD and MR.

Development

- Down syndrome with recurrent otitis media — cognitive assessment.

Jeddah — January 2025 — Day 1

Saudi Arabia | Centre: Jeddah | Source page 15

History

- 9-month-old boy; mother smoked during pregnancy; SGA; forceps delivery; jaundice; low platelets; microcephaly; bruises; diagnosed CMV; developmental delay; squint; vision and hearing problems (TORCH).

Communication

- Wolff-Parkinson-White (WPW) syndrome.
- Familial short stature.

Video

- Pertussis.
- Post-viral cerebellitis.

Clinical

- Thalassaemia.
- Residual PS.
- Treacher Collins syndrome.
- Hemiplegia.
- LMNL with renal fistula.
- Short stature (general).
- Quadriplegia.

Development

- 4-year-old with DMD, crawling on stairs, frequent falling and abnormal behaviour.

UK Recall 2025

United Kingdom | Centre: UK | Source page 1

History

- Short stature — 10 years old.

Communication

- Constipation and soiling concerns regarding the specific duration of treatment; need to explain exactly, including treatment of soiling.
- Trisomy; parent refused genetic referral. Explain the importance of genetic referral and the management plan.

Video

- Scarlet fever.
- Arrested epileptic patient after diazepam.

Clinical

- Spina bifida.
- Cranial nerve examination.
- Spherocytosis.
- Eye examination in a patient with a thyroid scar.
- Pansystolic murmur.
- Aortic stenosis (AS).

Development

- 2½-year-old child for cognitive assessment; autism and hearing impairment.

2024

44 sessions | 471 recall items | 10 centres

Egypt — December 2024 — Day 2

Egypt | Centre: Egypt | Source page 18

History

- Difficulty walking and speaking (DMD).

Communication

- Challenging behaviour; parent wants medication for ADHD.
- Baby on phototherapy has dehydration.

Video

- Croup.
- Eye swelling / anaphylaxis.

Clinical

- Same as Day 1, plus post-Kasai patient with hepatomegaly.

Development

- MPS — fine motor assessment.

Egypt — December 2024 — Day 1

Egypt | Centre: Egypt | Source pages 17-18

History

- Diabetes mellitus with loose motions and weight loss.

Communication

- Child not gaining weight — concern about CMPA.
- Asthma with non-compliance.

Video

- Congenital pneumonia.
- Dermatitis artefacta.

Clinical

- Mosaic Turner syndrome.
- PS.
- Diplegia.
- Thalassaemia.
- GSD.

Development

- GDD and autism — cognitive assessment.

Others

- Cushing syndrome effect on the eye.
- Achondroplasia.
- MR post-operative.
- Williams syndrome.

Jeddah — November 2024 — Day 2

Saudi Arabia | Centre: Jeddah | Source page 20

History

- Headache — differential diagnosis including brain tumour.

Communication

- Wrong aminophylline dose.
- ABO incompatibility and exchange transfusion.

Video

- SSSS.
- Reactive arthritis (history of three days).

Clinical

- UMNL, bedridden and quadriplegic.
- Hemiplegia.
- Ehlers–Danlos syndrome.
- Marfan syndrome.
- Noonan syndrome.
- Residual PS.
- Pacemaker.
- Thalassaemia.

Development

- Recurrent ear infections — cognitive assessment.

Pakistan — November 2024 — Day 2

Pakistan | Centre: Pakistan | Source pages 22-23

History

- Short stature in an adopted child; aunt is concerned — consider growth hormone deficiency versus familial short stature.

Communication

- Audit of ORS with a colleague.
- Autoimmune thyroiditis with deranged TSH/T4; explain further tests and evaluation to the mother; loose stool also present.

Video

- Pneumonia — respiratory examination of the back.
- Osteomyelitis with left-leg swelling.

Clinical

- Short stature with knock knees — inspect the legs and proceed.
- Hemiplegia affecting both upper and lower limbs.
- Chronic suppurative lung disease with left lobectomy scar and chest deformity.
- Gait assessment: short stature, knock knees, scoliosis and chest deformity.

Development

- Two-year-old with GDD: fine-motor assessment; possible IEM, TORCH infection or kernicterus.

Nepal — November 2024 — Day 2

Nepal | Centre: Nepal | Source page 24

History

- Relapse of Crohn's disease.

Communication

- Neonate with a hypoglycaemic seizure.
- Nephrotic syndrome.

Video

- Lymphadenopathy.
- Mastoiditis.

Clinical

- Quadriplegic CP.
- VSD with dextrocardia.
- Thalassaemia after splenectomy.

Development

- DMD — gross-motor assessment.

UAE — November 2024 — Day 2

United Arab Emirates | Centre: UAE | Source page 25

History

- Pneumonia with SIADH.

Communication

- Constipation — counsel the mother.
- ADHD and abnormal behaviour; teacher is concerned.

Video

- ITP.
- Reactive arthritis / transient synovitis.

Clinical

- Residual pulmonary stenosis.
- Cerebral palsy follow-up.
- Hemiplegia affecting the upper limb.

Development

- Speech and social assessment in a child previously admitted to the baby unit; large head and GDD.

Jeddah — November 2024 — Day 1

Saudi Arabia | Centre: Jeddah | Source page 19

History

- 12-year-old with functional chest pain due to social issues.

Communication

- PDA.
- Tension headache.

Video

- Croup.
- Pulled elbow.

Clinical

- Quadriplegic CP.
- Chronic kidney disease.
- Noonan syndrome with short stature.
- Dextrocardia with murmur over the pulmonary area and a scar.

Development

- 2.5-year-old with GDD, microcephaly and epilepsy — motor and milestones.

Pakistan — November 2024 — Day 1

Pakistan | Centre: Pakistan | Source page 21

History

- Epilepsy difficult to control, presenting with status epilepticus.

Communication

- Familial short stature in an adolescent requesting treatment.
- Hypertrophic pyloric stenosis with deranged ABG; parents want immediate surgery.

Video

- Periorbital cellulitis.
- Non-accidental trauma (NATT).

Clinical

- DMD.
- Hemiplegia.
- Down syndrome with respiratory examination for OSA.
- Rickets.
- VSD.
- GBS presenting as AFP.
- Glycogen storage disease.
- Hepatosplenomegaly.

Development

- Sturge–Weber syndrome.

Nepal — November 2024 — Day 1

Nepal | Centre: Nepal | Source page 23

History

- Haematuria in HSP with nephritis.

Communication

- Mother wants to give cereals with soya milk.
- NATT: four-month-old with bronchiolitis and bruises over both maxillae; discuss management.

Video

- DKA: differential diagnosis, treatment and complications.
- Bell's palsy.

Clinical

- Diplegic CP.
- Hemiplegic CP.
- ASD.
- Thalassaemia.
- General examination in Down syndrome.

Development

- Diplegic CP — gross-motor assessment.

UAE — November 2024 — Day 1

United Arab Emirates | Centre: UAE | Source page 24

History

- Cystic fibrosis.

Communication

- Neonatal seizure following hypoglycaemia.
- Nephrotic syndrome: mother refuses steroids.

Video

- Pyloric stenosis.
- Mastoiditis.

Development

- DMD.

UK — October 2024 — Set 1

United Kingdom | Centre: UK | Source page 26

History

- Adopted six-month-old with frequent vomiting.

Communication

- Thirteen-year-old with anorexia nervosa, CAMHS involved, 2-kg weight loss in one month, bradycardia and hypothermia; discuss management and nutritional support; blood glucose 3 with ketones +4.
- NATT in a nine-month-old with bruises on thighs and cheeks after being hit by the mother's partner; mother is anxious and worried.

Video

- Infantile spasms.
- Viral croup.

Clinical

- Ehlers-Danlos syndrome.
- Marfan syndrome.
- Poland syndrome.
- Residual murmur with median sternotomy scar.

Development

- Two-year-old child of a 17-year-old mother — fine-motor assessment.

UK — October 2024 — Set 2

United Kingdom | Centre: UK | Source page 27

History

- Anaphylaxis; mother has asthma and brother has allergy.

Communication

- Fourteen-year-old with paracetamol toxicity and self-harm; LFTs normal; unprotected sex and concern about STIs.
- Busy mother whose son has frequent asthma attacks and is not taking the brown inhaler; father smokes.

Video

- Ten-month-old with ITP.

- Twelve-year-old with five days of vomiting followed by sixth-nerve palsy.

Clinical

- Ten-year-old with pulmonary stenosis and no scar.
- Nine-year-old with right hemiplegia.
- Eleven-year-old with jaundice — abdominal examination.
- Nine-year-old with Turner syndrome, short stature and transverse abdominal scar.

Development

- Motor GDD with cataract, consanguinity and an uncle with a mobility problem.

UK — October 2024 — Set 3

United Kingdom | Centre: UK | Source page 29

History

- Six-year-old with syncope who needed oxygen in the emergency department — myocarditis.

Communication

- Sixteen-week-old with positive sweat and gene tests and loose stool; discuss school and the condition.
- Sixteen-year-old took two packs of paracetamol; level 240 after four hours; LFTs normal; mother refuses CAMHS before discharge.

Video

- Meningococcal rash.
- Nephrotic syndrome.

Clinical

- Sixteen-year-old with arachnodactyly and pansystolic murmur radiating to the axilla.
- LMNL in a short, obese wheelchair user.
- Three-year-old with vertical abdominal scar and PEG tube.
- MSK assessment: normal upper limbs and PGALS.

Development

- Two years three months — fine-motor assessment; history of febrile fits.

UK — October 2024 — Set 4

United Kingdom | Centre: UK | Source page 30

History

- Five-month-old with excessive crying and bruising — NATT.

Communication

- Type 1 diabetes presenting with seizures; explain the plan and management of recurrent hypoglycaemia.
- Discuss transfer of a jaundiced newborn because no beds are available.

Video

- Pleural effusion.
- Coeliac disease.

Clinical

- Sixteen-year-old with median sternotomy scar.
- Fourteen-year-old with ptosis — examine the face and cranial nerves.
- Ehlers-Danlos syndrome.
- Adolescent with liver-transplant scar.

Development

- Two-year-old with infantile spasms and neuroregression — motor assessment.

UK — October 2024 — Set 5

United Kingdom | Centre: UK | Source page 31

History

- Five-year-old with recurrent UTI.

Communication

- Six-week-old with laryngomalacia; mother insists on admission.
- Explain to a grandmother who is a rheumatologist why her preterm grandson requires surfactant.

Video

- Infantile spasms.
- ITP.

Clinical

- Quadriplegic and hemiplegic cerebral palsy cases.
- Eleven-year-old with epigastric abdominal scar and PEG.
- Neurofibromatosis.
- Respiratory case with FTT, short stature and tracheostomy scar.
- Down syndrome with VSD.
- Cystic fibrosis.
- Abdominal examination: hepatomegaly, ascites, distended vessels and stunted growth.

Development

- Four-year-old with brain tumour treated with chemotherapy and radiotherapy — assess fine motor.

Singapore — October 2024

Singapore | Centre: Singapore | Source page 32

History

- Syncope.

Communication

- MRSA colonisation in an ex-preterm NICU patient; discuss the result.
- Two-year-old with aggressive behaviour; mother thinks it is ADHD and wants methylphenidate.

Clinical

- Abdominal examination: liver-transplant scar with portal hypertension and jaundice.
- Respiratory examination in a two-year-old with distress, crepitations and wheeze — differential diagnosis.
- Hemiplegia.
- Residual pulmonary stenosis.

Development

- Two-year-old with regression — Rett syndrome.

Jeddah — September 2024 — Day 2

Saudi Arabia | Centre: Jeddah | Source page 28

History

- Down syndrome with hypothyroidism and constipation.

Communication

- HSP.
- ALL.

Video

- Shingles.

- Facial palsy.

Clinical

- Heart block with pacemaker.
- Quadriplegia.
- Ehlers–Danlos syndrome.
- Klippel–Feil syndrome.
- Thalassaemia.
- Renal failure.
- Complex congenital heart disease.
- Kartagener syndrome.
- Short stature.

Development

- Sturge–Weber syndrome — cognitive and milestone assessment.

Egypt — September 2024 — Day 2

Egypt | Centre: Egypt | Source page 35

History

- Chronic asthma.

Communication

- Gastrostomy.
- Infantile spasms.

Video

- Cushing syndrome.
- Mastoiditis.

Clinical

- LMNL / possible myopathy.
- Residual murmur.
- Noonan syndrome with scar.
- Thalassaemia.

Development

- Shaken baby syndrome with hemiplegia.

Jeddah — September 2024 — Day 1

Saudi Arabia | Centre: Jeddah | Source page 33

History

- Coeliac disease with FTT.

Communication

- Newly identified pancytopenia — counsel the mother about further work-up.
- Teenager with peanut allergy who did not think it serious enough to carry an EpiPen, then had an anaphylactic attack at a party.

Video

- GBS.
- Laryngomalacia.

Clinical

- Right hemiplegia.
- Thalassaemia.

- Noonan syndrome.
- Kartagener syndrome.

Development

- Fragile X syndrome — social and speech assessment; autism.

Egypt — September 2024 — Day 1

Egypt | Centre: Egypt | Source page 34

History

- Anaphylaxis with eczema; mother has asthma.

Communication

- The diagnosis is UTI rather than appendicitis.
- DMSA showing a 30% scar.

Video

- DDH.
- Asthma.

Clinical

- Glycogen storage disease.
- Short stature.
- Waddling gait and myopathy — differential diagnosis.

Development

- Four-year-old with Down syndrome, constipation, obesity, thyroid disease and GDD — fine-motor assessment.

Egypt — June 2024 — Day 2

Egypt | Centre: Egypt | Source pages 45-46

History

- Coeliac disease with hyperthyroidism.

Communication

- ROP.
- GDD with microcephaly.

Video

- Jaundice — differential diagnosis.
- Croup.

Clinical

- UMNL with quadriplegia.
- Diplegia.
- Pulmonary stenosis / mitral regurgitation.
- Kartagener syndrome.
- Arthritis.

Development

- Beckwith-Wiedemann syndrome — cognitive assessment.

Egypt — June 2024 — Day 1

Egypt | Centre: Egypt | Source page 45

History

- Constipation.

Communication

- EBM.
- Girl with Rolandic epilepsy.

Video

- CCHD.
- SSSS — “why not EH” is written in the source.

Clinical

- DMD.
- Pulmonary stenosis.
- Thalassaemia.
- Short stature — consider mosaic Turner syndrome and Noonan syndrome.

Development

- Fine-motor assessment in GDD.

UK — June 2024 — Set 1

United Kingdom | Centre: UK | Source page 36

History

- Child with three weeks of fever, diarrhoea and weight loss after coming from India; “HUS” is written in the source.

Communication

- Fifteen-year-old with anorexia nervosa.
- Fifteen-month-old admitted with URTI and started on antibiotics after radiology identified a thymus rather than pneumonia; explain to the mother.

Video

- PDA in a preterm infant with machinery murmur.
- Thirty-seven-week newborn with distress — congenital pneumonia.

Clinical

- Five-year-old after Kasai procedure.
- Quadriplegic CP.
- Turner syndrome.
- Syndromic child with tracheostomy and oxygen dependence.

Development

- Three-and-a-half-year-old Somali refugee in foster care for six months — social and speech assessment; tantrums and hearing problem.

Egypt — June 2024

Egypt | Centre: Egypt | Source page 37

History

- Functional constipation related to feeding habits.

Communication

- EBM.
- Rolandic epilepsy.

UK — June 2024 — Set 2

United Kingdom | Centre: UK | Source page 38

History

- Gastroenteritis with blood in stool.

Communication

- Mother on a detoxification regimen — management of the newborn.
- Discuss admission with the mother of a 13-year-old with anorexia nervosa.

Video

- Left-knee swelling.
- Mastoiditis.

Clinical

- Noonan syndrome with pulmonary stenosis.
- Neurofibromatosis.
- Dysmorphic child with chronic lung disease on nasal oxygen — general examination.

Development

- Two-and-a-half-year-old with behavioural and hearing issues, now in foster care; biological mother has alcohol and cannabis use — gross-motor assessment.

UK — June 2024 — Set 3

United Kingdom | Centre: UK | Source pages 39-40

History

- Eight-year-old with cystic fibrosis, two-week cough, weight loss and yellow-green sputum.

Communication

- Mother diagnosed with gluten-sensitive enteropathy; explain the condition to a teenage girl.
- Four-year-old with nephrotic syndrome and four relapses, no response to levamisole, then oedema and protein 3+ after a weekend with father; CRP 115 and BP 110/75 — discuss management.

Video

- Mastoiditis.

Clinical

- Marfan syndrome.
- Cushing syndrome in a chest case.

Development

- Three-and-a-half-year-old with delayed writing, hyperactivity and delayed gross motor — assess fine motor.

Singapore — June 2024

Singapore | Centre: Singapore | Source pages 40-41

History

- Simple obesity with OSA on overnight BiPAP and worsening breathing difficulty.

Communication

- Incorrect bottle feed given instead of breast milk; mother has eczema.
- Right renal pelvis dilated to 16 mm; explain prophylactic antibiotics and ultrasound within a week.

Video

- Shingles in a six-month-old on oral steroids.
- GBS with ten days of symptoms.

Clinical

- Thalassaemia.
- Repaired spinal dysraphism.
- TOF with residual pulmonary stenosis.
- Eye examination.

Development

- Two-and-a-half-year-old with Down syndrome, recurrent ear infections and GDD — gross-motor assessment.

UK — June 2024 — Set 4

United Kingdom | Centre: UK | Source pages 41-42

History

- Diabetes in Down syndrome with hyperglycaemia and lipodystrophy; needle phobia.

Communication

- Asthmatic child needs a brown inhaler; father smokes and the child uses the blue inhaler frequently.
- Explain chronic fatigue syndrome to a teenager.

Video

- Shingles.
- Bilateral eye oedema — hereditary angioedema.

Clinical

- Residual pulmonary stenosis.
- Jaundice, pallor and splenomegaly.
- Hypotonia in a wheelchair user with PEG, catheter and kyphosis.
- Turner syndrome with short stature.

Development

- Three-and-a-half-year-old with fetal alcohol syndrome; history taken from grandmother — motor assessment.

UK — June 2024 — Set 5

United Kingdom | Centre: UK | Source page 42

History

- Six-year-old with three weeks of fever and lethargy, refugee from India — probable infective cause.

Communication

- Anorexia nervosa, BMI 16.5 — discuss management.
- Thymus incorrectly diagnosed as pneumonia on chest X-ray.

Clinical

- Spastic diplegia.
- Post renal transplant.
- Syndromic child with recurrent chest infections.
- Murmur maximal at the aortic area.

Development

- Three-and-a-half-year-old in foster care — social and speech assessment.

UK — June 2024 — Set 6

United Kingdom | Centre: UK | Source page 43

History

- Breath-holding attack.

Communication

- Teenager with cystic fibrosis and Pseudomonas infection refuses antibiotics and admission.
- Child previously admitted with eczema herpeticum now referred by GP with moderate eczema.

Video

- Erb's palsy.
- Unilateral cervical lymphadenitis.

Clinical

- Spina bifida.
- Ehlers–Danlos syndrome.
- Non-operated VSD.
- Achondroplasia.

Development

- Fetal alcohol syndrome — motor assessment.

UK — June 2024 — Set 7

United Kingdom | Centre: UK | Source page 44

History

- Hyperthyroidism.

Communication

- ROP.
- Microcephaly with GDD.

Video

- Gilbert syndrome.
- Croup.

Clinical

- Hemiplegic CP.
- Neurofibromatosis.
- Residual pulmonary stenosis.
- Liver transplant.

Development

- Beckwith–Wiedemann syndrome — speech and social assessment.

Pakistan — May 2024 — Day 2

Pakistan | Centre: Pakistan | Source page 49

History

- Nine-month-old with FTT, rash and loose stool after weaning — coeliac disease versus CMPA.

Communication

- Features suggestive of coarctation of the aorta.
- Obesity explained to a medical student.

Video

- Blanchable rash — “mostly JIA” is written in the source.
- Lennox epilepsy syndrome.

Clinical

- Asthma.
- Aortic stenosis with murmur at the right upper sternal edge.

- Diplegic CP.
- Hepatosplenomegaly.

Development

- Williams syndrome with behavioural concern, ADHD and GDD — social assessment.

UAE — May 2024 — Day 2

United Arab Emirates | Centre: UAE | Source page 51

History

- Daytime enuresis with constipation and social issues.

Communication

- Vomiting in a three-week-old — explain mainly GERD to a medical student.
- Fourth febrile convulsion; mother requests work-up.

Video

- Acute viral hepatitis.
- Pleural effusion.

Clinical

- Cystic fibrosis.
- Bedridden diplegia.
- Thalassaemia.
- VSD.

Development

- Cognitive assessment in a three-and-a-half-year-old with autism.

Egypt — May 2024 — Day 2

Egypt | Centre: Egypt | Source page 55

History

- Relapsed Crohn's disease / ulcerative colitis.

Communication

- Eczema patient does not want referral to the GP.
- Medical colleague does not follow the guidelines.

Video

- Pneumonia with effusion.
- Erb's palsy.

Clinical

- TOF with residual pulmonary stenosis.
- Mitral regurgitation.
- SMA type 3.
- Hemiplegia.
- Quadriplegia.
- Glycogen storage disease.
- JIA.

Development

- NATT — motor assessment.

Pakistan — May 2024 — Day 1

Pakistan | Centre: Pakistan | Source page 48

History

- Headache.

Communication

- Jaundice case discussed with a medical student.
- Huntington disease.

Video

- JIA.
- Pneumonia with pleural effusion.

Clinical

- Glycogen storage disease.
- Asthma.
- Cerebral palsy.
- Short stature with rickets.

UAE — May 2024 — Day 1

United Arab Emirates | Centre: UAE | Source page 50

History

- Maturity-onset diabetes.

Communication

- Anorexia nervosa — talk to the mother.
- Discuss cystic-fibrosis newborn screening with a medical student.

Video

- Post-varicella cerebellitis.
- SSSS.

Clinical

- Spina bifida.
- MPS with hepatosplenomegaly.
- Aortic regurgitation.
- Skeletal dysplasia.

Development

- Two-and-a-half-year-old with speech and language GDD and recurrent ear infection.

Egypt — May 2024 — Day 1

Egypt | Centre: Egypt | Source page 54

History

- Anaphylaxis.

Communication

- Seventeen-year-old with thalassaemia — discuss puberty and pregnancy.
- Mother of a two-and-a-half-year-old with E. coli infection is angry after multiple venepunctures.

Video

- Bronchiolitis.
- Dermatitis artefacta.

Clinical

- Pulmonary stenosis.
- Ataxia.
- Spherocytosis versus thalassaemia.
- Thyroid examination.

Development

- Rett syndrome with autism.

Jeddah — May 2024 — Days 1-2

Saudi Arabia | Centre: Jeddah | Source pages 46-48

History

- Cystic fibrosis after a trip, presenting with cough.
- Crohn's disease relapse or non-compliance.
- Tension headache.

Communication

- Huntington chorea.
- Jaundice case discussed with a medical student.
- Twenty-four-week newborn with no NICU availability; transfer 100 km to a tertiary hospital.
- Dilated renal pelvis at 24 hours — prophylactic antibiotics and ultrasound after one week.
- Glycopyrrolate for a child with CP, recurrent chest infection and choking.
- Circumcision.

Video

- Arthritis (JIA) / SLE.
- Post-viral cerebellitis.
- Intestinal obstruction.
- Kawasaki disease.
- ITP.
- Pleural effusion.

Clinical

- Ehlers-Danlos syndrome.
- Thalassaemia.
- UMNL with spastic gait.
- Residual pulmonary stenosis.
- Treacher Collins syndrome.
- Kartagener syndrome.
- Russell-Silver syndrome.
- Right hemiplegia.
- Mitral regurgitation or VSD.

Development

- Autism with GDD.
- DMD.
- Three-year-old with Williams syndrome — fine-motor assessment.

Malaysia — May 2024

Malaysia | Centre: Malaysia | Source pages 52-53

History

- Orbital cellulitis.
- Stiffness during feeding — GERD.

Communication

- Discuss admission with a midwife for neonatal jaundice and 10% weight loss.
- Child with type 1 diabetes presenting in DKA — management and sick-day rules.
- ADHD and Ritalin.
- UTI with normal ultrasound — counsel mother about follow-up and prophylaxis.

Video

- Pertussis.
- ITP.
- Bell's palsy.
- SSSS.

Clinical

- Skeletal dysplasia.
- Bronchiectasis.
- ASD.
- Diplegic CP.

Development

- Tall stature with macrocephaly — fine-motor assessment.
- Speech and social assessment in autism with regression and a new-onset seizure.

Jeddah — March 2024 — Day 1

Saudi Arabia | Centre: Jeddah | Source page 58

Communication

- Talk to the mother of a child with leukaemia who presents with fever.

Video

- HSP.
- Laryngomalacia.

Clinical

- Thalassaemia.
- Quadriplegia.
- Treacher Collins syndrome.
- Operated heart with pulmonary stenosis.

Unspecified Centre — March 2024

Unspecified | Centre: Unspecified Centre | Source page 56

History

- JIA.

Communication

- Apology after lumbar puncture.
- Leukaemia with fever — febrile neutropenia.

Video

- Facial nerve palsy.
- HSP.

Clinical

- Quadriplegia.
- Treacher Collins syndrome.
- Operated VSD.
- Operated pulmonary stenosis.
- Ehlers–Danlos syndrome.

Development

- Foster mother with a child with GDD.

Oman — March 2024

Oman | Centre: Oman | Source page 57

History

- Asthma.

Communication

- Pyloric stenosis and fluid management explained to a medical student.
- Foster baby found to have TOF — talk to the social worker.

Video

- Meningococcaemia.
- Ophthalmia neonatorum.

Clinical

- Right hemiplegia.
- Cystic fibrosis.
- Residual pulmonary stenosis.
- Splenomegaly.

Development

- Gross-motor assessment — CMT versus DMD.

Jeddah — January 2024 — Day 2

Saudi Arabia | Centre: Jeddah | Source page 62

History

- Epilepsy.
- Nephrotic syndrome with high blood pressure.

Communication

- Vitamin K.
- Resuming milk feeds in NEC.
- Growing pains.
- NATT.

Video

- Self-harm.
- Monoarthritis.
- Pertussis.
- Post-varicella cerebellitis.

Clinical

- Pulmonary stenosis.
- Thalassaemia.
- Quadriplegia.
- Treacher Collins syndrome.

Development

- Eighteen-month-old — fine-motor assessment.
- Down syndrome with hypothyroidism.

Jeddah — January 2024 — Day 1

Saudi Arabia | Centre: Jeddah | Source page 61

History

- Arthritis in HSP.

Communication

- Tracheoesophageal fistula.
- Toddler diarrhoea.

Video

- Unilateral high-steppage gait.
- Pertussis.

Clinical

- Hepatosplenomegaly with laparotomy scar.
- Thalassaemia.
- Short stature — Noonan or Russell–Silver syndrome.
- Hemiplegia.
- Quadriplegia.
- Dextrocardia / Kartagener syndrome.
- Pulmonary stenosis.
- MSK hypermobility.

Development

- Motor assessment: convulsions/fits beginning at 4 months, followed by developmental regression.

2023

9 sessions | 113 recall items | 5 centres

UAE — November 2023 — Day 2

United Arab Emirates | Centre: UAE | Source page 59

History

- Four-year-old adopted child with Down syndrome and ALL.

Communication

- NATT with fractured humerus; mother works and lives with a new partner.
- Controlled epilepsy in a 15-year-old girl who developed an oculogyric crisis.

Video

- Facial palsy.
- Asthma exacerbation.

Clinical

- Alagille syndrome.
- Diplegia in Down syndrome.
- MPS — cardiovascular examination.
- Thyroid examination.
- Pacemaker.
- VSD or mitral regurgitation.
- Rickets with portacath.
- Spina bifida.
- Thalassaemia after splenectomy.

Development

- Two-year-old with PVL, GDD and diplegia.

UAE — November 2023 — Day 1

United Arab Emirates | Centre: UAE | Source page 60

History

- Addisonian crisis.

Communication

- Medical error involving a dexamethasone dose in croup.
- Growing pains.

Video

- Infant with tracheostomy and respiratory distress.
- Bell's palsy.

Clinical

- Right-sided hemiplegia.
- Pansystolic murmur / pulmonary stenosis.
- Chronic haemolytic anaemia.
- Achondroplasia.
- MPS.

Development

- Two-year-old with fine-motor GDD and regression.

India — November 2023

India | Centre: India | Source page 63

History

- Nephrotic syndrome with high blood pressure.

Communication

- Counsel a mother whose child presented with a burn; two other children attended the emergency department in the last six months — safety measures.
- Growing pains.

Video

- Pertussis.
- Post-varicella cerebellitis.

Clinical

- VSD.
- Diplegic CP.
- Thalassaemia.
- General examination for short stature.

Development

- Four-year-old with Down syndrome and regression due to congenital hypothyroidism — fine-motor assessment.

India — October 2023

India | Centre: India | Source page 65

History

- Multiple food allergies with anaphylaxis and asthma in a seven-year-old.

Communication

- Three-day-old baby with a fit; ultrasound showed right cerebral ischaemia — counsel the mother.
- Wrong lumbar puncture — discuss with the mother.

Video

- GBS.
- Croup.

Clinical

- Thalassaemia.
- Spina bifida.
- Mixed cerebral palsy.
- VSD.

Development

- Speech and language delay with snoring and recurrent ear infections; expressive delay greater than receptive delay.

Egypt — September 2023 — Day 2

Egypt | Centre: Egypt | Source page 69

History

- Thirteen-year-old with epilepsy and non-compliance.

Communication

- Counsel a woman at 20 weeks' gestation about cleft lip and palate.

- NATT discovered in a three-year-old with primary ciliary dyskinesia; source mentions a nurse.

Video

- Pertussis in a child with tracheostomy and NG tube.
- Bell's palsy.

Clinical

- Thalassaemia.
- Pulmonary stenosis / mitral regurgitation.
- Quadriplegic CP.
- Cushing syndrome.

Development

- Three-and-a-half-year-old with autism — social and speech assessment.

Egypt — September 2023 — Day 1

Egypt | Centre: Egypt | Source page 68

History

- Eight-month-old with fits due to hypocalcaemia and vitamin-D deficiency / rickets.

Communication

- NEC.
- Coeliac disease in a patient with diabetes and positive TTG; needs endoscopy and biopsy.

Video

- Croup.
- Scarlet fever.

Clinical

- Splenomegaly.
- Thyroid examination.
- Russell-Silver syndrome.
- Quadriplegia.
- Diplegia.
- CMT.

Development

- Motor GDD.

Nepal — September 2023 — Set 1

Nepal | Centre: Nepal | Source page 64

History

- Uncontrolled type 1 diabetes.

Communication

- Fifteen-year-old — H. pylori management.
- Dexamethasone in croup — the source records "10 doses".

Video

- Thirty-seven-week newborn with grunting and tachypnoea.
- ITP.

Clinical

- Right hemiplegia.
- VSD.

- General examination in Down syndrome with left thoracotomy scar.
- Thalassaemia.

Development

- Macrocephaly with delayed walking — motor assessment.

Nepal — September 2023 — Set 2

Nepal | Centre: Nepal | Source pages 66-67

History

- Three days of fever and three infection episodes requiring three antibiotic courses.

Communication

- Nephrotic syndrome relapse.
- Familial short stature — mother requests investigations.
- HSP with blood and protein in urine; mother is worried about meningococcaemia.
- Fractured humerus — talk to an angry mother.

Video

- Leukaemia.
- Bell's palsy.
- Asthma exacerbation.
- Facial nerve palsy.

Clinical

- VSD.
- Hemiplegia.
- General examination for congenital hypothyroidism.
- Thalassaemia.
- Spina bifida.
- Mitral regurgitation in Marfan syndrome.

Development

- Eighteen-month-old cared for by grandmother, small head and traumatic delivery — motor assessment and GDD.

UK — February 2023

United Kingdom | Centre: UK | Source pages 70-71

History

- Febrile neutropenia.
- Spastic diplegia.

Communication

- Gastrostomy.
- DDH.
- Faecal impaction and soiling with poor adherence to treatment.
- Thirteen-year-old fainted at school with iron-deficiency anaemia.

Video

- Asthma.
- Cerebellar ataxia.
- CCHD.
- NATT.

Clinical

- Pulmonary stenosis.

- Abdominal scars and PEG.
- Spina bifida.
- Neurofibromatosis type 1.
- General examination in diabetes using a syringe pump.
- Hydrocephalus.
- MSK examination for JIA.

Development

- Cognitive assessment.
- Two-and-a-half-year-old with autism — social assessment.
